SUMMARY

With over 20 years in web and app development, I now specialize in generative AI and NLP. I have consistently delivered quality solutions across various sectors, ensuring strong support for teams, stakeholders, and clients.

PROFESSIONAL SKILLS

To build teams of technology enthusiasts delivering quality work on time and budget. Sourcing talent, planning and executing technology projects, managing multicultural agile teams in English and Spanish, while keeping stakeholders in the loop. AI Front-end and back-end programming, low code and no code. Platform agnostic. Learning new tech constantly professionally and as a hobby.

EDUCATION

Systems Analyst at IAC 1996 - 1999
Fluent in English and Spanish

2013-2023 | BYTERY LLC | FOUNDER

As the founder of Bytery.com, a successful software design and development studio, I led a team that worked with numerous high-profile clients, including Mercedes-Benz, Garmin, Hakkasan Group, and Tao Group. Over the course of my tenure, I managed multiple projects simultaneously, delivering exceptional results on time and within budget. My latest project is a SaaS AI chatbot that allows clients to chat with their data with Retrieval Augmented Generation (RAG)

2013-2020 | VENUEDRIVER/HAKKASAN GROUP | FRONT END ENGINEER

I played a critical role in enhancing the online presence of major restaurants and nightlife venues in Las Vegas, as well as supporting the development of an internal system designed to streamline ticket sales and venue management. I worked on numerous projects, including deploying cutting-edge technology stacks and launching new websites. Among our clients were superstar DJs like Calvin Harris, Steve Aoki, Armin Van Buuren, Kaskade, Tiesto, and many others, for whom I provided top-tier backend support to ensure seamless performance and user experience.
