Agents

Python, LangGraph, MCP, OpenAI Agents SDK, Claude Code and Codex swarms, tool calling, RAG, evaluation-driven development, guardrails

Models

Anthropic Claude, OpenAI GPT, Google Gemini, xAI Grok via their APIs, Bedrock and Azure AI Foundry; Ollama local inference; vision, voice and video models (Gemini vision, WhisperX, ElevenLabs, Suno, Seedance, OpenCV)

Backend

Python, Bash, FastAPI, Flask, SQLAlchemy, PostgreSQL, pgvector, Redis, Pandas, FFmpeg, REST, GraphQL

Infra

AWS (EC2, S3, RDS), Azure, Docker, Nginx, PM2, Linux, OAuth 2.0

Frontend

TypeScript, React, Next.js, Node.js, AlpineJS, TailwindCSS

Selected clients

Mercedes-Benz · Garmin · MGM Resorts · Hakkasan Group · Tao Group · Urvenue

Education

Systems Analyst, IAC
English C2 · Spanish native

AI ENGINEER · AGENTIC SYSTEMS

Roberto Galán

I have shipped production software every year since 1999, and more in the last two than in the previous 25, since I stopped writing most of the code myself and started directing coding agents. I build for two users: the agent that uses the tool and the person who has to trust it.

10	160+ h	99.8%
production AI platforms shipped end to end in 12 months	of manual work removed every week, measured per team	of sales orders auto-confirmed by an agent

Head of Engineering & AI

Kynship · 2025 – now

+ Forecasting pipeline ingesting Shopify, Meta, Google Ads, Amazon and TikTok for every client brand into Postgres, replacing manual spreadsheets; strategists now review instead of build.
+ Own engineering and the AI roadmap for a D2C growth agency (Shopify and Amazon brands), partnering with leadership.
+ Creative-analysis engine (Meta Marketing API, vision models, evals) used by the whole strategist team: 120 analyst hours saved weekly.
+ Retrieval-grounded ad concept generator over 13k enriched customer profiles, gated by automated quality checks: ads 10× faster.

Automation Engineer

GreenGrowth CPAs · 2024 – 2025

+ LLM-assisted audit back-office in a regulated accounting domain: 30 hours saved per audit.
+ RAG knowledge assistant in Slack; QuickBooks → AWS → Power BI pipelines: 16 hours saved weekly. AI voice outreach converting 1% of cold calls.

Founder & Engineering Lead

Bytery LLC · 2013 – 2024

+ Founded and ran a full-stack studio for 11 years, 15-person team, technical lead on every engagement (Mercedes-Benz, Garmin, MGM Resorts).
+ Latest build: WhatsApp-native AI order desk (voice, photo and PDF orders, per-line confidence) with one-click SAP export, auto-confirming 99.8% of sales orders.

Lead Full Stack Engineer

Venuedriver, via Bytery · 2013 – 2020

+ Led e-commerce engineering for Las Vegas and New York hospitality properties (Hakkasan, Omnia, Tao); owned ticketing and venue-management architecture that replaced third-party ticketing, saving millions in fees.

Senior Advisor, early team

Investars.com · 1999 – 2010

+ Dot-com startup tracking Wall Street analyst recommendations: charting and financial data delivery systems. Acquired.
